Whether for practical reasons or purely as an aesthetic solution this truly is a multi functional product that will enhance your home or business...

APPLICATION

Applications are wide and varied with a strong emphasis on balcony enclosures, room dividers and window protection, where privacy and sun shading is required.

Available as a fixed or adjustable blade, Elipso Premium Louvre Shutters can be mounted directly to the facade of a building or supplied within its own framework

The adjustable louvre system allows you to control the amount of light and airflow, or have them fully closed and even locked for added security.

ELIPSO PREMIUM LOUVRE SHUTTER STANDARD COLOUR RANGE

A range of Premium colours are also available.

The colours represented in this brochure are for marketing purposes only and may differ from actual product. Please check with your distributor before placing an order regarding colour and delivery time.

DESIGN.

The aluminium frames and blades can be supplied in anodised or powder coated finishes, to the colour of your choice.

The 90mm louvre blade had been specifically designed and engineered to cope with all types of weather conditions and have been tested for noise, wind load and resistance to wind pressures for cyclone regions.

Elipso Premium Louvre Shutters are custom made to suit your specific requirements and are available in a number of different configurations such as fixed, adjustable, stacking, bi-folding, sliding and hinged.
